01 PROFESSIONAL SUMMARY

COMPLEXITY IS THE
ENEMY. CLARITY IS THE
EDGE. EXECUTION IS THE
STANDARD.

Forward-Deployed Engineer with an unusual pairing: nine years building enterprise technical systems and eight running my own electrical and telecom contracting business. I work at the architecture level — translating ambiguous customer requirements into deployed, working software — with the field background to know what happens when the documentation and the physical installation disagree. Experience spans AI and agentic systems, cloud infrastructure, and enterprise integration.

02 PROFESSIONAL EXPERIENCE

United Uprising, Inc.

FOUNDER & SYSTEMS ARCHITECT

[MM/YYYY] – PRESENT

- ▶ Built and maintain a local-first AI research harness: retrieval, indexing, connector orchestration, and a terminal agent, with a reversible context-compression layer cutting operational token overhead to ~62% of baseline.
- ▶ Deliver WebGL geospatial visualization tooling and data pipelines handling WGS84 transforms and KML/GeoJSON/CSV interchange.

Meta – Contract

JAN 2023 – NOV 2025

SOFTWARE ENGINEER · REMOTE

MAR 2024 – NOV 2025

- ▶ Delivered enterprise AI, cloud identity management, and workplace automation for large organizations.
- ▶ Deployed AI business agents across Instagram and WhatsApp; integrated Meta Workplace with Okta, Entra ID, Google Workspace, SAML SSO, HR ticketing, and facilities systems.

DEPLOYMENT ENGINEER · HYBRID

JAN 2023 – MAR 2024

- ▶ Architected private AWS and Google Cloud environments for Llama 2 and Llama 3 deployments against proprietary enterprise data.

Whatnot, Inc.

DEPLOYMENT ENGINEER · CONTRACT

MAR 2021 – DEC 2022

- ▶ Supported deployment, platform reliability, developer tooling, and backend infrastructure for a high-traffic live-commerce marketplace.
- ▶ Managed CI/CD pipelines and release automation; built monitoring and release-validation tooling.
- ▶ Maintained cloud infrastructure, real-time streaming, and messaging architecture supporting live auctions across Python and Go.

Signature Healthcare

APR 2018 – NOV 2020

NETWORK ENGINEER

▶ Administered enterprise networks, infrastructure services, and access management across healthcare environments; diagnosed connectivity and systems failures and coordinated incident resolution under availability and security requirements.

Compucom

FEB 2017 – APR 2018

SOFTWARE SPECIALIST

▶ Installed, configured, and repaired enterprise software, workstation systems, and network hardware; troubleshot OS and connectivity failures in end-user support.

Kindred Healthcare

APR 2016 – FEB 2017

DEVICE ENGINEER

▶ Administered enterprise networks, infrastructure services, user access, and device hardware across hospital environments.

Mathis Electric LLC

JAN 2009 – NOV 2016

OWNER / OPERATOR

▶ Owned and operated a commercial and residential electrical and telecom contracting business — bidding, scheduling, crew coordination, and customer delivery.

▶ Commercial scope: service and panel work, conduit and raceway, load calculations, structured cabling and telecom rough-in, print reading and redlining, NEC compliance, and inspector and trade coordination on active sites.

▶ Routinely reconciled as-built field conditions against drawings where stacked revisions had drifted out of sync with the installation.

Earlier — Electrical Trade

New Albany, IN

▶ **Beard Electric** — Site Lead / Job Site Manager: ran crews and daily job-site execution on commercial and residential work.

▶ **Paradise Electric** — Helper / Associate.

03

EDUCATION & CERTIFICATIONS

SULLIVAN UNIVERSITY — COLLEGE OF TECHNOLOGY AND DESIGN

Bachelor of Science in Information Technology

Summa Cum Laude · GPA 3.9 · October 2018

GOOGLE AI PROFESSIONAL CERTIFICATE

7-course program · 2026

INDEPENDENT ELECTRICAL CONTRACTORS (IEC)

Electrical apprenticeship program — residential and commercial

IBM — RAG & GENERATIVE AI

Build RAG Applications and Develop Generative AI Applications · Jul 2026

04

TECHNICAL SKILLS

LANGUAGES

Python, Rust, TypeScript, SQL, HTML/CSS, PowerShell

AI & CLOUD

Agentic architectures, MCP servers, RAG pipelines, LangSmith, AWS, Google Cloud, CI/CD, monitoring

INTEGRATION

REST APIs, Okta, Entra ID, SAML SSO, Google Workspace and Notion APIs, GitHub, WebGL, geospatial (WGS84, KML)
